U.S. ARMY CORPS OF ENGINEERS FAR EAST DISTRICT

DISTRICT INSTALLATION SUPPORT A Business Concept For Installations

Far East District

1. Who is FED?

The Far East District(FED) is the Department of Defense(DOD) Design and Construction agent for all Military Construction(MILCON) in Korea. It also executes and/or monitors the design and construction of the Combined Defense Improvement Program(CDIP), the Republic of Korea Funded Construction Program(ROKFC) and the ROK Facilities Exchange Program. The Far East District also provides planning, design and construction services for Operations and Maintenance(O&M) and other reimbursable programs as part of the District Installation Support Business Concept.

2. Who is USACE?

The Far East District is only a part of the US Army Corps of Engineers. The US Army Corps of Engineers, or USACE, is an Army Major Command comprised of a Headquarters element in Washington DC and Major Subordinate Commands, or Division Offices and number of Districts geographically disbursed throughout the World. In addition, USACE assets include organizations such as US Army Center of Public Works, US Army Topographic Engineering Center, US Army Cold Region Research and Engineering Lab, US Army Engineer Waterways Experiment Station and the US Army Construction Engineering Research Lab.

3. The District Installation Support "Business Concept"

"Installation Support" is a service available to installations. Its purpose and intent is to consistently provide quality, responsive and cost-effective engineering and technical support.

It is a business concept focused on providing enhanced mission support capability, supplemental technical capabilities and expanded manpower capacity to the installation when needed.

Installation Support begins at the installation. Our support is initiated at the installation, at your direction, and usually when it's determined that the service or task required exceeds the installation's in-house professional/technical capabilities.

Your request receives priority indicative of our Vision, "be the agency of choice for engineering services in Korea".

USACE activities worldwide have specialized personnel, capabilities and services not ordinarily available at the installation. As a member of the Total DoD engineering team, USACE serves as a partner with the installation in the shared mission to maintain facilities/installations for the good of our service members and their families. With one call to the Far East District you have actually "plugged in" to the entire network of USACE resources.

As a business concept, it's simple - The Far East District, with the rest of USACE in Support, Works For You!

4. What Services Are Available from FED?

- **Master Planning**
 - Comprehensive Master Plan
 - Facility Utilization Analysis
 - Utilities Studies
 - Geographic Information System (GIS)
 - DD Form 1391 Development
 - Facility Allowance Analysis
 - Infrastructure Studies
 - Special Planning Studies
 - Programming
 - Mobilization Master Planning
- **Life Cycle Project Management**
 - Single POC Concept for the Customer
 - Cradle to Grave, or the complete life cycle of the project
 - Coordination of all assets and resources required to complete the project.
- **Contracting Support**
 - Technical/Engineering Studies
 - JOC and SABER Contracts
 - Indefinite Delivery Type Contracts (IDT)
 - All Design and Construction
 - Requirements Contracts
 - Service Contracts
- **Technical Engineering**
 - Technical/Engineering Studies
 - Comprehensive Design Technical Reviews
 - Special Technical Consultants
 - Multi-Disciplinary Design Services
 - Value Engineering
- **Construction Services**
 - Construction Management
 - Quality Assurance
 - Water Well Drilling
 - Contract Administration
 - Warranty Support
- **Environmental Services**
 - Asbestos Abatement Requirements Contract
 - Soil & Ground Water Analysis
 - Water Treatment
 - Underground Storage Tank Removal
 - Spill Remediation
 - Environmental Training
 - Hazardous & Toxic Materials/Waste
 - Landfills
 - Wastewater Treatment
 - Lead Based Paint Abatement
 - Transformer Inspection for PCBs

5. Our Execution Objectives

- Ready to Mobilize for Peace & War Initiatives
- Postured to meet customer's current and future needs
- Continuously improving our efficiency and effectiveness
- Provide U.S. Forces Korea with highly professional, high quality, cost effective, responsive services, safely during peace and war.
- Partnering

6. How is FED Funded?

Unlike other elements of the Department of the Army and the Federal Government at large, Corps Districts are primarily funded on a project-by-project basis. The Far East District operates like a non-profit corporation and uses a cost distribution concept. Under this concept, general and/or administrative expenses associated with the day-to-day operation of the District are equitably distributed to all direct funded and reimbursable projects thereby rendering the office self-sustaining. While this concept was foreign to the Department of Defense community, until the concept of the Defense Business Operating Fund (DBOF) surfaced, it has been widely employed in the private sector. Project costs accumulated under this concept are all inclusive and portray the true cost of a given project.

The Far East District is not bulk funded from HQDA or HQUSACE and we do not receive a salary appropriation to fund our staff. Instead, we are allocated spaces without dollars, and then must pay for spaces through project earnings such as, Planning and Design (P&D) fees and Supervision and Administration (S&A) fees.

7. How to Contact FED?

Address: Department of the Army
Far East District, Corps of Engineers
Program & Project Management Division.
ATTN: CEPOF-PP, Unit #15546
APO AP 96205-0610

POCS : Mr. Scott R. Bearden
email: scott.bearden@pof01.usace.army.mil
Tel: (DSN) 721-7429 (Com'l) 011-822-270-7429
Fax: 011-822-270-7487

Mr. Robert E. Losey
email: robert.losey@pof01.usace.army.mil
Tel: (DSN) 721-7647 (Com'l) 011-822-270-7647
Fax: 011-822-270-7424

Mr. Milton N. Matsuyama
email: milton.matsuyama@pof01.usace.army.mil
Tel: (DSN) 721-7093 (Com'l) 011-822-270-70936.
Fax: 011-822-270-7424
